Subject: Combined Region 6 and Region 8 sediment graphs

Hi David,

Attached are the combined Region 6 and Region 8 sediment graphs.

I excluded 2 samples (NSW-020-150812-52 and T01-SED01-150812-52) from the region 6 data set as I believe them to be field duplicates. The word file that accompanied the sediment data stated, "Nine sediment samples were collected from nine locations on Wednesday, August 12, 2015, along the Animas and San Juan Rivers...." There were a total of 11 samples in the data file, so excluding these 2 made sense to me as they were collected on the same day/time as NSW-020-150812-51 and T01-SED01-150812-51.

Let me know if you need anything else.

Thanks,

Rebekha Shaw
